

## IMPORTANT SAFETY NOTICE

# VOLUNTARY RECALL NOTICE

## CERVÉLO CYCLES 2005 R2.5 BICYCLE FRAME

Cervélo Cycles has identified a potential safety issue involving the down tube loosening or separating from the head tube on a limited number of R2.5 frames. This loosening or separation could cause the rider to lose control of the bicycle under certain or extreme conditions. Therefore, in cooperation with the U.S. Consumer Product Safety Commission (CPSC), Cervélo Cycles has issued a voluntary recall for R2.5 bicycle frames. No injuries have been reported to Cervélo related to this recall. Cervélo is committed to ensuring the highest internal and industry standards of all its products and, therefore, as a precautionary measure, and in the interest of putting the safety of its consumers first, Cervélo has decided to commence a voluntary recall of all affected R2.5 frames.

**Only frames sold between December 2005 and May 2006, with the paint schemes pictured below and with serial numbers greater than R251700 are subject to this recall. Consumers may have purchased R2.5's as framesets or complete bicycles.**
