Cervelo **Soloist Carbon**

By combining the light weight of Cervelo's R2.5 carbon frameset and the aerodynamics of their aluminum Soloist Team frames, Cervelo has added the Soloist Carbon to their line. Ridden and tested by the CSC team during the 2005 season, the Soloist Carbon is now available in pro bike shops nationwide. Cervelo's mantra, "no compromises" holds true in this remarkable ride. Cervelo made minor adjustments to the Soloist Carbon by adding a new profile downtube, a higher bottom bracket with a stiffer bottom bracket, laterally stiffened chainstays and one-position aero carbon seatpost. \$3200 frameset; \$4400/Ultegra; \$5000/Dura-Ace
